Languages
Hebrew, English, Russian

Profile

UX/UI product designer who owns the work end to end, from the first user interview to the final design system. I turn complex workflows into interfaces people understand without being taught, and I back every decision with research. Two years guiding students through full product projects in Figma taught me to explain and defend design choices to any room. Open to remote or hybrid roles.

Experience

Design Teacher & Teaching Intern — 2024–2025

Kiryat Tivon High School

- Led **product design projects in Figma**, from brief and concept through user flows, screen construction and visual hierarchy.
- Mentored students in **defining user experience** through UI/UX processes and translating research into interface decisions.
- Taught design fundamentals, digital thinking and concept development; built original lesson plans and studio activities.
- Guided **final projects** and curated end-of-year student exhibitions.
- Prepared and submitted students for the Applied Arts matriculation exam, with one-to-one mentoring throughout.

Graphic Designer — 2023–2024

Hadashot Caesarea Newspaper

- Designed editorial layouts for **print and digital** using InDesign and Photoshop, on a weekly publishing cycle.
- Produced graphic assets and visual branding materials, keeping a consistent identity across issues.
- Worked to deadline alongside full-time design studies.

Network Administrator — 2018–2020

IDF, Home Front Command, C4I Corps

- Maintained computing and communications systems across base and field units.
- Installed and supported encrypted systems in classified zones during operations and exercises.
- Worked in a complex systems environment under pressure, with responsibility, order and teamwork.
